

Sarnafil® Décor Profile

Construction

Overview	Sarnafil Décor Profile is a durable, Sarnafil PVC extrusion used to emulate the appearance of a standing seam metal rib roof on a Sarnafil roof system.
Material	Décor Profile is made of the same high quality ingredients used to manufacture Sarnafil roof membranes. Décor Profile is available in various colours to match specific design needs.
Features	Décor Profile Roof Systems combine the aesthetic qualities of traditional metal roofs and the watertight security of Sarnafil membrane on both new and refurbished projects of any design, shape and pitch. Heat-weldable flanges to secure Décor Profile onto Sarnafil membrane.
Installation	Décor profile can be easily hot air welded onto finished roof membrane by using hand welding gun or Sarnamatic 661 welding machine combined special conversion kit.
Packaging	Décor Profile is supplied in tubes containing 25 pieces of 3 m long each and min. 30 connecting pins.

Important Notification

The information, and, in particular, the recommendations relating to the application and end-use of Sika's products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The proprietary rights of third parties must be observed. All orders are accepted subject of our terms and conditions of sale. Users should always refer to the most recent issue of the Australian version of the Technical Data Sheet for the product concerned, copies of which will be supplied on request.
