

Application Field: Waterproofing

Market Field: Transport and Infrastructure

CAMPBELL ST. SUBSTATION

Requirement: The lift shafts and general structure of this development required waterproofing

Solution: SikaSwell S-2 and SikaSwell Profile products provided swellable watertight joint sealants that were economically placed, and provided excellent water resistance.

Product Used:

SikaSwell S-2: extrudible swelling water stops for construction joints.

SikaSwell Profile: swellable water stop.
