

Application Field: Industrial Flooring

Market Field: Manufacturing Industry

BUTCHERS SHOP RESOURCES

Requirement: This large wholesale butchery required a heavy duty, durable, slip resistant flooring system that could withstand chemical attack and have high mechanical strength to ensure smooth operation. More importantly the floor had to comply with regulatory (AQIS) standards.

Solution: The floor was primed with Sikafloor-156 Primer and a non-slip epoxy coating Sikafloor-261 was then applied to a thickness of 5mm to produce a non-slip and abrasion resistant finish.

Product Used:

Sikafloor-156 Primer: low viscosity, solvent free epoxy primer.

Sikafloor-261: solvent free, coloured, universal epoxy resin based flooring system.
