

Application Field: Industrial Flooring

Market Field: Manufacturing Industry

GOTZINGER SMALL GOODS

Requirement: The food processing plant required a heavy duty, durable slip resistant floor that could withstand chemical attack and have high mechanical strength to ensure the smooth operation of food processing.

Solution: Sikafloor-94 Primer and Sikafloor-91 were applied to a total area of 600 metre square at 5 mm thickness to produce an abrasion resistant and solvent free finish. The system was applied in two sections, one grey, the other red in colour.

Product Used:

Sikafloor-94 Primer: low viscosity, solvent free epoxy primer.

Sikafloor-91: a three-component solvent free epoxy resin based mortar for patching and screeding industrial floors subject to heavy traffic.
