

Application Field: Industrial Flooring

Market Field: Hospitality Industry

HARVEY NORMAN SHOWROOMS

Requirement: The Harvey Norman Kitchen Showroom required a tough and durable floor coating similar to those required in typical restaurants, bars and cafes.

Solution: A scratch coat of Sikafloor-156 was originally used followed by a top coat of the SikaGlaze PU, leaving a tough and durable finish to the floor that gave a gloss appearance.

Product Used:

Sikafloor-156: a low odour epoxy resin used as a primer or a scratch coating.
SikaGlaze PU: a non-yellowing clear polyurethane coating.

Advantages:

- Excellent mechanical strength
- Non-yellowing when exposed to UV
- Easy to apply
- Leaves an aesthetic gloss finish
