

Application Field: Waterproofing

Market Field: Reinforced Concrete Structures

SCARBOROUGH APARTMENTS

Requirement: For this large open deck entertainment area (258 m²), the cracks had to be waterproofed with high quality membranes since previous other membranes did not perform and water went through.

Solution: The tiles had to be lifted and Sika Tite-LM was applied to stop water penetrating through cracks. Previous membranes had to be grounded off prior to the application of Sika Tite-LM.

Product Used:

Sika Tite-LM: Water based liquid waterproof membrane.

Sikaflex-11FC: One component polyurethane sealant/adhesive.

Project Details

Date: April 2004	Location: Scarborough, Qld
Specifier: William Dalton & Associate Engineers	
Contractor: Total Maintenance & Waterproofing Pty Ltd	
Sika Representative: Chuck Stowe
